

— CROSS-BORDER LOGISTICS PLATFORM

The platform that powers cross-border logistics.

FreightWorkflow unifies your end-to-end operation on one intelligent system — jobs, documents, ACI/ACE compliance, tracking, and billing. Trusted by the operators who move North America's freight.

— WHY FREIGHTWORKFLOW

One system. One price. Every module.

Flexibility without fragmentation. Performance without compromise. Replace spreadsheets, email threads, and disconnected tools with one connected system — with built-in integrations to customers, carriers, and government systems, at no extra integration cost.

— PLATFORM

All modes. All borders. One platform.

International Forwarding

Automate operations across modes and borders — capacity, rate management, booking, and last-mile trucking on one job.

Customs & Compliance

ACI northbound and ACE southbound manifest filing with pre-transmission validation that catches errors before the border.

Transport & Trucking

Dispatch, trip sheets, and proof-of-delivery capture, tied to the same shipment your forwarder and broker are working.

Warehouse

Track inbound and outbound inventory with a flexible warehouse layer connected to jobs, documents, and billing.

Carrier Connectivity

Automate the order-to-cash cycle from booking to invoice with 60+ carrier and customs integrations out of the box.

Enterprise Tools

Multi-branch, multi-entity operations with documentation, tracking, and accounting built in — everything under one roof.

— SOLUTIONS BY ROLE

Built for every operator in the chain.

One connected system for the teams that quote, clear, move, and bill North America's freight.

FREIGHT FORWARDERS & NVOCCS

Quote to cash on every job

- House & master B/L generation and consolidation
- Quotation and rate management with margin control
- Customer portal with shared shipment visibility

CUSTOMS BROKERS

Filing built for the crossing

- Direct ACI & ACE electronic transmission
- Pre-transmission validation and hold prevention
- Duty, tariff, and classification workflows

TRANSPORTERS & CARRIERS

Dispatch tied to the shipment

- Dispatch board, trip sheets, and driver assignment
- Mobile proof-of-delivery capture and status updates
- Fleet, equipment, and trip-cost tracking

ENTERPRISE & 3PLS

Multi-branch, multi-entity, one roof

- Multi-branch and multi-currency consolidation
- Group-level reporting and KPI dashboards
- SSO, granular permissions, and audit controls

— SECURITY & INFRASTRUCTURE

- **SOC 2 Type II** compliant — encryption in transit & at rest, role-based access, full audit logging
- **99.98% uptime** with redundant infrastructure and regional North American data residency
- **60+ integrations** out of the box — carriers, customs authorities, accounting, EDI
